

SCHOOL FEES

We are all very much aware of the present economic realities in the nation. Prices of commodities have risen to more than quadruples, because of the unimaginable level of inflation.

As it stands, MSV is yet to do an upward review her fees, presently for this, some keen analyst have said, current position is unsustainable especially with the high standard the school is known for and aiming at. However, our hearts are wide opened and as the development unfolds, we will get you informed.

Before closing with this my last remark, I wish to state categorically, that what is now the top priority is to reduce to zero the level of indebtedness by the parents. In a nutshell, except parents who have fully paid us for this outgoing session, no debtors will be permitted into this arena from day 1 of the resumption for the new incoming session

Hopefully, we will get the support of everyone of us (Present year now or not) on this going forward
